

**INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY JUNE 15, 2004 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was light nationally with 148 fires reported. One new large fire was reported in the Southern Area. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Kansas, Nevada, New Mexico, Oklahoma, Texas, Utah and Wyoming.

SOUTHWEST AREA LARGE FIRES:

SEDGWICK, Cibola National Forest. A Type 2 Incident Management Team (Winchester) is assigned. This fire is 17 miles west of Grants, NM in ponderosa pine. Inaccessible terrain and smoke along the Interstate 40 corridor are major concerns. Fire activity is dominated by terrain-driven winds and low 1000 hour fuel moistures. The fire became plume dominated in the afternoon due to burn out operations.

THREE FORKS, Apache-Sitgreaves National Forest. A Type 2 Incident Management Team (Kvale) is assigned. This fire is 11 miles west of Alpine, AZ in ponderosa pine and mixed conifer. Active fire behavior was reported on the eastern flank and within the interior.

PEPPIN, Lincoln National Forest. This fire is six miles northeast of Capitan, NM in timber. Steep terrain, poor accessibility, heavy fuel loading, prolonged drought and high winds are ongoing concerns. Active surface fire with flame lengths of three to five feet and torching was observed. Increase in acreage is due to more accurate mapping and burn out operations.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

WRD = White River Field Office, Bureau of Land Management

OUTLOOK:

Red Flag Warning: Through Tuesday for the northern and western sections of the Sacramento Valley.

Weather Discussion: High pressure is building off the Pacific Northwest coast while an upper low remains parked over southern California. In Alaska, an upper ridge over the area is producing a southeast flow across the interior.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
SOUTHWEST AREA Mostly sunny west, partly cloudy east. Dry with locally breezy conditions. Widely scattered thunder-storms northern New Mexico mountains, eastern New Mexico plains and west Texas.	60s and 70s mountains, 80s and 90s lower elevations, 100 to 105 southwest Arizona deserts.	5 to 15% most areas, 15 to 30% northern New Mexico mountains, eastern New Mexico and west Texas.	Southwest 10 to 20 mph with some higher gusts, except south to southeast 10 to 20 mph eastern plains of New Mexico and west Texas.
ROCKY MOUNTAIN AREA Breezy with widely scattered mixed wet/dry Thunder-storms, southern Colorado. Widely scattered wet Thunder-storms eastern plains.	70s and 80s for most of the Rocky Mountain Area. 60s and 70s for mountains. Eastern Rocky Mountain Area 80s and 90s.	Less than 15% southern Colorado and southern Wyoming.	West wind 10 to 20 mph over most of Wyoming and South Dakota. South wind 15 to 30 mph over southern Kansas.
SOUTHERN CALIFORNIA AREA Areas of morning low clouds and fog into the coastal valleys, otherwise partly cloudy with scattered afternoon showers and thunderstorms over Central California from the Sierra eastward.	65 to 75 coastal areas. 70 to 85 mountains. 80 to 95 valleys. 90 to 100 upper deserts. 100 to 110 lower deserts.	20 to 40%.	Southeast to southwest 5 to 15 mph.
NORTHERN CALIFORNIA AREA Clear.	70s coast and higher elevations and mid 80s to upper 90s inland and lower slopes.	10 to 22% inland areas.	Northeast to east 6 to 12 mph except northeast 8 to 18 mph gusts 25 to 35 mph in the Sacramento Valley

REFUSING RISK (“TURNDOWN” PROTOCOL)

Every firefighter has the right and obligation to report safety problems and contribute ideas regarding their safety. Supervisors are expected to give these concerns and ideas serious consideration. When an individual feels an assignment is unsafe, they also have the obligation to identify, to the degree possible, safe alternatives for completing that assignment. Turning down an assignment is one possible outcome of managing risk.

- A “turndown” is a situation where an individual has determined an assignment cannot be undertaken as given, and they are unable to negotiate an alternative solution.
- A “turndown” must be based on an assessment of risks and the ability of an individual or organization to control those risks.
- A situation may be a candidate for a “turndown” if:
 - There is a violation of safe work practices.
 - Environmental conditions make the work unsafe.
 - The forces lack the necessary qualifications or experience.
 - Defective equipment is being used.
- The following steps will be used when turning down an assignment:
 - The individual will directly inform their supervisor that they are turning down the assignment as given. (Document using criteria outlined in the risk management process.)
 - Supervisor will notify the Safety Officer immediately upon being informed. In the absence of a Safety Officer, the appropriate Section Chief or Incident Commander will be notified. This step provides accountability for decisions and initiates communication of safety concerns.
 - If the supervisor requests another resource to perform the assignment, he/she is responsible for informing that resource that the assignment has previously been refused and the reason(s) why.
 - The safety hazard should be documented by the submission of a SAFENET or SAFECOM.
- These actions do not stop an operation from being carried out. This protocol is integral to the effective management of risk as it provides timely identification of hazards to the chain of command, raises risk awareness for both leaders and subordinates, and promotes accountability.
